● ABOUT ME

Hello, my name is Osman Uğur Demirer.

Since I was 13, I have dreamed of improving myself in the IT sector due to my interest in computers, and in order to realize this dream, I have tried to reach information that will improve myself in my spare time, this effort and desire still continues.

Instead of my passion for IT, I studied insurance in my high school life. About 3 years ago, I decided to gain experience in the field of IT and worked for 1.5 years at a hosting company called Climax Host. In this way, I had the opportunity to develop myself in the fields of networking, software and operating systems.

I want to improve my skills more in the field of IT by relying on my youth and my determination to learn, to find new job opportunities and to experience the experiences that these will add to me.

● WORK EXPERIENCE
